Moreover, to protect personal data, appropriate procedures based on high-level security standards have been incorporated in the network, and controls are carried out on a regular basis to ensure strict implementation of the criteria established by the Bank for this purpose.

NBG implements appropriate organizational and technical measures for data security and protection against any data breach, such as accidental or unlawful destruction, accidental loss, alteration, unauthorized disclosure or access as well as any other form of unlawful processing. XII. INFORMATION REGARDING PROCESSING OF PERSONAL DATA THROUGH VIDEO SURVEILLANCE SYSTEM AND OTHER SECURITY SYSTEMS

Purpose and lawfulness of processing

The Bank uses a surveillance system for the purpose of protecting persons and goods.

The processing is necessary for compliance with a legal obligation of the Bank as the controller (article 6 par. 1. (c) of the GDPR), and in particular the Ministerial Decision No. 3015/30/6/23.03.2009 (Government Gazette B' 536/23.03.2009) "Determination of security conditions for branches of credit institutions", as amended and in force.

At the same time, the processing is necessary for the purposes of the legitimate interests pursued by the Bank as the controller (article 6 par. 1. (f) of the GDPR).

In addition, if you are entering in a Branch of the Bank that has a relevant information sign regarding the photographing of those entering it, we inform you that the entry in this particular Branch is done through double entrance doors, where a security system is installed with a camera to simply take a picture of the upper torso of the body and the face of the entrants.

The security system does not identify or verify the identity of incoming customers, for example by recognizing an eye iris or fingerprints, but processes characteristics of the geometry of the face of the person entering in order to prohibit entry to those persons who have their characteristics covered (that is, persons who wear glasses, a hat, a mask, a helmet, a scarf, etc.).

This processing is necessary for the purposes of the legitimate interests pursued by the Bank as the controller (article 6 par. 1 (f) of the GDPR).

Analysis of the legitimate interests

The legitimate interest of the Bank consists in the need to protect the premises of the Bank's facilities and the goods found in them from illegal acts, such as thefts, criminal activities, etc. The same applies to the safety of life, physical integrity, health as well as the assets of the Bank's staff and third parties who are carrying out business with the Bank (ie persons with transactional relationship with the Bank) who are legally in

the supervised area. The Bank collects only image data and has limited reception to places where it has been assessed that there is an increased likelihood of committing illegal acts (eg theft), such as in cash registers in its Branches, in Automatic Cash Registers (ATMs) and in the entrance of the Bank's Branches and Buildings, without focusing on places where the privacy of the persons whose image is being taken may be excessively restricted, including their right to respect their personal data.

In addition, with regard to the entrance security system of the Bank's Branches where persons entering are being photographed, this photography is done on behalf of the Bank for the sole purpose of prevention and deterrence of criminal acts, protecting persons with transactional relationship with the Bank, staff and assets of the Bank. .

Recipients

The material collected is accessible only by the competent / authorized personnel of the Bank who is in charge of the security of the premises. This material shall not be transmitted to third parties, except in the following cases: (a) to the competent judicial, prosecutorial and police authorities when it includes information necessary to investigate a criminal act involving persons or goods relating to the controller, (b) to the competent judicial, prosecutorial and police authorities when requesting data, legally, in the exercise of their duties, and (c) to the victim or the perpetrator of a criminal offense, in the case of data which may constitute evidence of the act.

Data retention period

The Bank maintains the video surveillance data for the period set for banks and financial institutions according to the currently applicable regulatory framework and in particular the relevant Instructions and Decisions of the Hellenic Data Protection Authority, after which they are automatically deleted. If during this period cases of organized financial fraud or questioning of a financial transaction arise, the relevant parts of the video surveillance system data may be kept in a separate file with appropriate security measures for as long as required for the investigation and disciplinary or judicial prosecution of these incidents

In addition, with regard to the entrance security system of the Bank's Branches where those entering are photographed, it is noted that the photographic file is kept for twenty-four (24) hours. After the expiration of the above-mentioned retention period, the said file is deleted, while it is not be transmitted to any recipient, except in the case of a criminal offense.

Rights of data subjects

For your information on your rights as data subjects as well as how to exercise these rights, you can refer to Unit IX above (*IX. WHAT ARE YOUR RIGHTS REGARDING YOUR PERSONAL DATA?*)

To evaluate a request for providing a copy of your image, you need to determine when you were in the range of the cameras and give a copy of your image to make it easier to locate your data and hide the data of third parties involved. Alternatively, you are given the opportunity, after submitting your relevant request and locating the relevant data by the Bank, to come to the Bank's facilities in order to be shown the images in which you appear. It should also be noted that the exercise of the right to object or

erasure does not imply the immediate erasure of data or the amendment of the processing. In any case, the Bank will respond to you in detail as soon as possible, within the periods set by the GDPR.

XIII. RECORDING OF TELEPHONE CONVERSATIONS

NBG uses technical means for recording telephone conversations with clients in the context of serving transactions carried out by clients with specific Bank Units when performing and providing relevant transaction activities in accordance with the institutional framework in force at any given time.
