Global Markets Roundup

National Bank of Greece | Economic Analysis & Research Division | November 28, 2023

Global equities rose further, with the S&P500 recording the fourth consecutive weekly gain

- Bullish sentiment in the equity market remained in place, due to estimates that major central banks are done with hiking. The S&P500 increased by +1.0% wow, marking the fourth consecutive week of positive returns (+19% YtD), with realized volatility declining further (see graph below).
- Government bond yields moved sideways, remaining away from their recent multi-year highs (US Treasury 10-year: 4.38%, down from a 16-year high of 4.99% on October 19th). On the other hand, UK Gilt yields increased by +12 basis points to 4.22%, in view of stronger than expected economic data. In the event, the composite PMI exited contractionary territory for the first time since July 2023, at 50.1 in November from 48.7 in October, versus consensus for 48.7.
- Oil prices were roughly stable (Brent: \$80.6), ahead of the OPEC+ meeting on November 30th. Although media reports suggest that the OPEC+ is contemplating further supply cuts, the postponement of the meeting, initially set to take place on November 26th, led to speculation that a consensus among country members remains challenging. The extension of the Israel-Hamas ceasefire and the declining likelihood of a wider Middle East conflict removes risk premia.
- Looking forward, the Fed's preferred metric to gauge inflation (October's Personal Consumption Expenditures Price Index) and November's CPI in the euro area, both due on November 30th, will give fresh insights into inflation developments and monetary policy prospects.
- If not for an upside inflation surprise, the Federal Reserve as well as the ECB appear set to stand pat on December 13th & 14th, respectively, with attention turning on how long it will take for interest rate cuts to commence. The transmission of the insofar monetary policy tightening to the real economy, remains a key factor for the timing and the scale of the future easing.
- Regarding the euro area, recall that non-financial corporations took advantage of ultra-easy funding conditions in 2021 (see graph below), providing themselves "breathing room" against the consequent tightening of monetary policy and higher funding costs. Recall also that 71% of households' mortgage debt is at a fixed rate, albeit with large divergences at the country level.
- In Germany, legislative mobility continues after the Constitutional Court deemed that the planned re-allocation of €60 billion (1.5% of GDP) of unused pandemic funds mainly towards projects and subsidies related to the climate crisis, was in breach of the "debt brake".
- The latter is a self-imposed constitutional rule aiming at avoiding an increase in the public debt-to-GDP ratio, by restricting the structural budget balance to -0.35% of GDP per year at the federal level (-1.1% for 2024, according to European Commission forecasts). The temporary suspension of the brake is on the cards. In any case, the finalization of the 2024 Budget may be delayed up to end-January 2024.
- Finally, investors will keep an eye on Fitch's rating decision regarding Greece on December 1st. A potential upgrade (current rating of BB+ with a stable outlook) to Investment Grade could pave the way for an expansion in the investor base for Greek financial assets and improving funding conditions for Greek non-financial corporations and financial institutions.

US housing market: not out of the woods, yet

- Sales of existing homes remained depressed in October in view, inter alia, of a particularly low availability of existing houses for sale (1.15mn versus an average of 2.23mn since 1990). Specifically, existing home sales fell by -4.1% mom in October (-14.6% yoy), to 3.79mn (annualized), undershooting consensus estimates for 3.90mn. The latest performance is the lowest since August 2010 and compares with a long-term (since 1990) average of 4.92mn (-40.4% compared with a peak of 6.36mn in November 2021). Meanwhile, new home sales decreased by -5.6% mom (+17.7% yoy) in October, to 679k (annualized), versus consensus estimates for 721k, remaining though close to their average of 699k since 1990.
- Recall that, currently, 72% of total houses for sale are existing ones, compared to an average of 87% since 1990, *inter alia* as **higher mortgage interest rates due to monetary policy tightening have limited the incentive of (home-owning) households to refinance home purchases.** In the event, according to data from Freddie Mac, the 30-year fixed mortgage rate stood at 7.29% for the week ending on November 23rd. Although a stabilization has taken place recently (peak of 7.79% in late-October 2023), the latest reading is still far above an average of 4.1% since 2010 (and 3.45% in January 2022). In that context, mortgage applications remain depressed according to the Mortgage Bankers Association, at -72% compared with late-January 2022 for the week ending November 17th.
- On the one hand, the aforementioned low supply of existing homes, supports the bargaining power of sellers. On the other hand, the funding capacity of prospective homebuyers is challenged by high mortgage interest rates, combined with stretched house price valuations. Regarding the latter, note that the nominal median price levels for existing homes stood in October at +47% compared with a trough in January 2020, while nominal personal incomes have risen by +23% from January 2020 to September 2023. The nominal median existing home sales price was little changed in October, moderately down by -0.3% mom (+3.4% yoy).
- Notably, many new houses remain in the pipeline (1.69mn in the phase of construction, versus an average of 0.96mn since 1990), arguing in favor of the prospects for new home supply. However, still high construction costs limit the downside for prices. In the event, note that prices paid for goods used in residential construction declined by -1.0% mom in October (-0.8% yoy), albeit still standing higher by +37% versus January 2020.
- High construction costs and elevated interest rates (which increase the cost of financing for home builders and land developers), weigh on housing starts, albeit the low availability of houses for sale remains an important supporting factor for prices. In all, housing starts increased by +1.9% mom (-4.2% yoy) to 1372k (annualized rate) in October, modestly above consensus estimates for 1350k and a long-term average of 1322k. At the same time, building permits rose by +1.1% mom (-4.4% yoy) at 1487k (annualized rate), versus expectations for 1450k and a long-term average of 1348k.
- Looking forward, the aforementioned challenges for the funding capacity of prospective home buyers, weighs on homebuilders' confidence for new home sales. Indeed, the respective index derived from the National Association of Home Builders (NAHB) survey for November, fell by -6 pts to an 11-month low of 34, well below the threshold of 50, above/below which a positive/negative stance is indicated.

Euro area November PMIs improved modestly, albeit remaining meaningfully in contractionary territory

- The composite PMI rose by +0.6 pts to 47.1 in November, slightly above consensus estimates for 46.9, albeit still meaningfully below the expansion/contraction threshold of 50.0. A weak influx of new business remained the major drag, a development which bodes ill for (short-term) growth prospects. The aforementioned downturn for new orders remained broad based, as was also the case for overall activity, with the PMI increasing only modesty, by +0.4 pts to 48.2 in the services sectors (below 50.0 for a 3rd consecutive month) and by +0.7 pts to 43.8 in its manufacturing peer (below 50.0 for a 16th consecutive month). Notably, weak demand and an overall muted business confidence, resulted in companies reducing employment levels (even though marginally) for the first time since the start of 2021.
- On price developments, weak demand and cheaper raw materials maintained the selling prices component below 50 in the manufacturing sector for a 7th consecutive month. In a contrarian note, services providers managed to pass on higher costs (related to wages) to consumers, with the selling prices component at a 3month high (and well above 50.0).
- Regarding PMI performance by country, France underperformed Germany and (more so) the rest of the euro area. In France, the composite PMI was slightly down in November, by -0.1 pt to 44.5. Both the services PMI (+0.1 pt to 45.3) and its manufacturing peer (-0.2 pts to 42.6) were little changed. Germany's composite PMI increased by +1.2 pts to 47.1 in November. The services PMI rose by +0.5 pts to 48.7, while its manufacturing counterpart was up by +1.5 pts to 42.3. The IFO business survey modestly improved in November, with the business climate index up by +0.4 pts to 87.3 (consensus for 87.5), albeit still meaningfully below an average of 96.4 since 2005.

Inflation in Japan remains meaningfully above Bank of Japan's target

Headline CPI accelerated by 0.3 pps to 3.3% yoy in October, while CPI ex-Fresh Food, the inflation metric to which the Bank of Japan (BoJ) links its price stability target of 2% (annual growth), came out at +2.9% yoy from +2.8% yoy (consensus for +3.0% yoy). The acceleration was mainly due to Energy prices increasing by +4.1% mom nsa, leading the annual growth of the Energy subcomponent at -8.6% from -11.7% previously. CPI ex-Fresh Food & Energy, the most prominent of the metrics that the BoJ uses to gauge underlying pressures, given also its relatively high reliance on domestic economic conditions, eased by -0.2 pps to +4.0% yoy in October. In all, the BoJ anticipates that inflation (CPI ex-Fresh Food) will remain above target, with median estimate of its Policy Board members standing at 2.8% yoy on average in fiscal year 2023 (i.e. from April 2023 to March 2024) and 2024, before easing to 1.7% yoy in fiscal year 2025. Still, the BoJ has signaled an intention to stick to its ultra-accommodative monetary policy stance (short-term policy rate: -0.1%, yield curve control so that the 10-year Japanese government bond yield stands at "around" 0%, Quantitative Easing), judging that after a decades-long period of very low inflation (30-year average of +0.3% yoy), the current period of above-target outcomes could prove constructive for inflation to stabilize around 2% in the more medium term. As a result of monetary policy divergence, the Yen has depreciated by -16% since the start of 2023 against the euro, to ¥162.8.

Equities

 Global equity markets rose in the past week. The S&P500 ended the week up by +1% (+19% ytd), recording its 4th consecutive week with gains while reaching its highest level since August 1st (4559). Sector-wise, the IT sector rose by +0.6% wow, with Microsoft overperforming (+2% wow | +57% ytd) and recording a new all-time high (\$378 | market cap of \$2.8 trillion), as investors assessed the developments regarding the OpenAl's CEO Altman as positive for the company. In the event, on November 17th the board of directors of OpenAl (the company behind the AI chatbot ChatGPT) fired Altman stating that he was not always truthful with the board, with President G. Brockman resigning hours later. On Monday, Microsoft, which is OpenAl's biggest stakeholder with a \$13 billion investment in the company, announced that it hired both Altman and Brockman to lead a new advanced AI research team. Finally, on Tuesday, Altman returned to OpenAI as CEO while a reforming of the company's board of directors was announced, with the board's new chair being the former co-CEO of Salesforce, B. Taylor and the former US Treasury Secretary L. Summers being a BoD member. On the contrary, Nvidia declined by -3.1% wow (+245% YtD), despite announcing better-than-expected earnings results in Q3:2023 (EPS of \$4.02 versus consensus estimates for \$3.37 from \$0.58 in the same quarter of 2022), with investors being concerned regarding Nvidia's guidance/expectations that sales to China and other destinations, which typically account for 20-25% of total data center revenue, will decline significantly in Q4:2023 due to new export controls by the US Government. Recall that on October 17th, the US Government announced new and updated licensing requirements for exports to China and Country Groups D1, D4, and D5 (including but not limited to Saudi Arabia, the United Arab Emirates, and Vietnam, but excluding Israel) of products exceeding certain performance thresholds, including Nvidia's A100, A800, H100, H800, L4, L40, L40S and RTX 4090 products. Nevertheless, the company mentioned that the decline will likely be more than offset by strong growth in other regions.

 Long-term government bond yields increased in the past week. Specifically, the 10-Year US Treasury yield rose by +3 bps wow to 4.47%, while its 2-year peer ended the week up by +5 bps wow to 4.95%, with investors' attention turning gradually to the Federal Reserve's (Fed) next meeting (December 13th). On Monday however, the trend reversed with yields declining (10-year: -9 bps | 2-year: -8 bps). In the UK, the 10-Year Gilt rose by +20 bps wow to 4.31%, and the 2-year yield by +19 bps wow to 4.73%, following better-than-expected PMI data. Notably, the UK Finance Minister Hunt presented his Autumn Statement budget announcements intra-week, stating that he delivers the biggest business tax cut in modern British history and the largest ever cut to employee and selfemployed National Insurance. Nevertheless, the Office for Budget Responsibility expect that the overall tax burden is still set to increase to 37.7% of GDP by 2028-29, a post-war high. In Germany, the 10-year Bund yield rose by +6 bps wow to 2.65%, amid a possible suspension of the debt brake for 2023 and ECB's Governing Council member R. Holzmann comments that the chances of another rate hike is no smaller than that of rate cuts. Periphery bond spreads narrowed slightly (Italy: -3 bps to 174 bps | Spain: -2 bps to 99 bps | Portugal: -2 bps to 62 bps | Greece: -6 bps to 116 bps - low since October 2021).

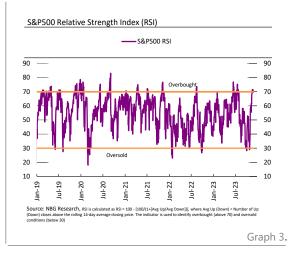

FX and Commodities

• In foreign exchange markets, the US Dollar depreciated against the euro by -0.5% wow to \$1.094, the lowest level since mid-August, following the divergence in PMI data for November in the US (slightly weaker-than-expected) and the euro area (slightly better-than-expected). In commodities, oil prices were little change in the past week (Brent: broadly stable wow at \$80.6/barrel | WTI: -0.5% wow to \$75.5/ barrel). Meanwhile, gold prices rose in the past week (+1.1% wow to \$2002/ ounce), with a weaker USD, inter alia, likely playing a role (-0.5% wow in trade-weighted terms – DXY Index).

Quote of the week: "This is not the time to start declaring victory. We need to remain attentive to the different forces affecting inflation and firmly focused on our mandate of price stability", President of the ECB, Christine Lagarde, November 27th 2023

6-12-Month View & Key Factors for Global Markets US **Euro Area** UK Corporate profitability is expected to improve in + Higher equity risk premium (lower P/E ratio) Higher equity risk premium (lower P/E ratio) Significant exposure to commodities 2024, with annual EPS growth of 12% relative to benchmark market (US) relative to benchmark market (US) Undemanding valuations in relative terms China's policy support measures could + accelerate an export-led recovery Geopolitical uncertainty (Ukraine-Russia, natural + gas) could re-intensify The economic backdrop remains muted - Eigenbergies (1994) China's policy support measures could accelerate an export-led recovery JPY depreciation from #132 to ¥148 (12%), if continues, could support exporters Signs of policy fatigue regarding structural reforms and fiscal discipline Yield-Curve Control twists, letalone a sustained shift in ultra-loose monetary policy could but ondernating valuations in relative terms relative to other regions Elevated domestic policy uncertainty The BOE is expected to continue increasing interest rates as inflation remains very high and labor market extremely tight Households' balance sheets are healthy (low debt, still elevated excess savings) debt, still elevated excess savings) Peaking profit margins Recession risks remain P/Es (Valuations) above long-term means, with apremium or 15%: Current P/E of 18.1xvs a 20year average of 15.8x Markets Equity Fiscal policy will turn restrictive in 2024 shift in ultra-loose monetary policy, could hurt market benchmarks (but support Banks) Neutral Neutral/Positive Neutral Neutral $In flation \, expectations \, could \, drift \, higher \, due \, to \,$ Valuations appears o mewhat rich, with term-ECB to continue unwinding its balance sheet via The range of Yield-Targeting of 10-Year JGB at around 0% could widen further (implicitly @ +100 bps) premium, albeit increasing to -0.1%, remaining its APP portfolio supply disruptions (persistent post Brexit, its APP portfolio Global spillowers from higher US interest rates ECB QE "stock" effect, with government bond holdings of 63.9 trillion (27% of GDP) The ECB is likely close to be done with rates Fragile economic growth outlook due to the war supply disruptions (persistent post Brexit, temporary due to China) The BOE is expected to continue increasing interest rates as inflation remains very high and labor market extremely tight BOE: active (sales) Quantitative Tightening below 2000-2015 averages (1.4%) Fiscal deficits to remain sizeable in following Global spillovers from higher US interest rates Safe-haven demand Monetary stance remains extremely dovish, years Underlying inflation pressures remain acute FED: passive (lower rollover) Quantitative despite the unexpected shifts in YCC policy QE "stock" effect, with government bond holdings of ¥594 trillion (102% of GDP) Tightening Global search for yield by non-US investors (e.g. Japan, repatriation from EM Economies) could in Ukraine Slowing economic growth post-Brexit Safe-haven demand bid to support prices assuming geopolitical risks re-intensify The FED is likely close to be done with rates Slightly higher yields ▲ Slightly higher yields ▲ Slightly Higher yields ▲ Slightly Higher yields USD interest rate differential vs peers remain significant + Lower geopolitical uncertainty (Ukraine-Russia, + natural gas) is positive for EUR + tactural gas) is positive for EUR + Economic growth could accelerate in 2024, safe-haven demand status suggesting further interest rate hikes by the ECB+ USD political uncertainty to increase - Global growth risks could abate Safe haven demand More balanced economic growth recovery (long - term) Higher core Inflation rates could accelerate the shift of monetary policy (less accommodative) Valuations appear undemanding with REER below its 15-year average Sizeable Current account deficit Exchange The FED is close to be done, which reduces Foreign potential USD upside Range-bound with upside risks against the USD Broadly Flat USD against G10 FX ▲ Stronger JPY Broadly stable GBP

Economic Calendar

In the US, the main macro event next week is the second estimate of GDP for Q3:23, which is released on Wednesday. GDP growth is expected to be slightly higher at 5.0% qoq saar compared with the first estimate of 4.9% qoq saar. October's personal income and consumption along with PCE data (the Fed's preferred measure for gauging inflation developments) for October will gather investors' attention. On Monday, ISM Manufacturing survey is expected to be stable at 47.6 and will provide an update on business confidence.

In the Euro area, attention turns to inflation data for November. CPI is expected at 2.8% yoy from 2.9% in the previous month, while the core figure is expected at 3.9% yoy from 4.2%. Also, the unemployment rate is expected to remain at 6.5% for October.

DISCLOSURES:

This report has been produced by the Economic Research Division of the National Bank of Greece, which is regulated by the Bank of Greece, and is provided solely as a sheer reference for the information of experienced and sophisticated investors who are expected and considered to be fully able to make their own investment decisions without reliance on its contents, i.e. only after effecting their own independent enquiry from sources of the investors' sole choice. The information contained in this report does not constitute the provision of investment advice and under no circumstances is it to be used or considered as an offer or an invitation to buy or sell or a solicitation of an offer or invitation to buy or sell or enter into any agreement with respect to any security, product, service or investment. No information or opinion contained in this report shall constitute any representation or warranty as to future performance of any financial instrument, credit, currency rate or other market or economic measure. Past performance is not necessarily a reliable guide to future performance. National Bank of Greece and/or its affiliates shall not be liable in any matter whatsoever for any consequences (including but not limited to any direct, indirect or consequential losses, loss of profits and damages) of any reliance on or usage of this report and accepts no legal responsibility to any investor who directly or indirectly receives this report. The final investment decision must be made by the investor and the responsibility for the investment must be taken by the investor.

Any data provided in this report has been obtained from sources believed to be reliable but has not been independently verified. Because of the possibility of error on the part of such sources, National Bank of Greece does not guarantee the accuracy, timeliness or usefulness of any information. Information and opinions contained in this report are subject to change without notice and there is no obligation to update the information and opinions contained in this report. The National Bank of Greece and its affiliate companies, its representatives, its managers and/or its personnel or other persons related to it, accept no responsibility, or liability as to the accuracy, or completeness of the information contained in this report, or for any loss in general arising from any use of this report including investment decisions based on this report. This report does not constitute investment research or a research recommendation and as such it has not been prepared in accordance with legal requirements designed to promote investment research independence. This report does not purport to contain all the information that a prospective investor may require. Recipients of this report should independently evaluate particular information and opinions and seek the advice of their own professional and financial advisers in relation to any investment, financial, legal, business, tax, accounting or regulatory issues before making any investment or entering into any transaction in relation to information and opinions discussed herein.

National Bank of Greece has prepared and published this report wholly independently of any of its affiliates and thus any commitments, views, outlook, ratings or target prices expressed in these reports may differ substantially from any similar reports issued by affiliates which may be based upon different sources and methodologies.

This report is not directed to, or intended for distribution to use or use by, any person or entity that is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to any law, regulation or rule.

This report is protected under intellectual property laws and may not be altered, reproduced or redistributed, or passed on directly or indirectly, to any other party, in whole or in part, without the prior written consent of National Bank of Greece.

ANALYST CERTIFICATION:

The research analyst denoted by an "AC" on page 1 holds the certificate (type Δ) of the Hellenic Capital Market Commission/Bank of Greece which allows her/him to conduct market analysis and reporting and hereby certifies that all of the views expressed in this report accurately reflect his or her personal views solely, about any and all of the subject issues. Further, each of these individuals also certifies that no part of any of the report analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed in this report. Also, all opinions and estimates are subject to change without notice and there is no obligation for update.
