Total Annual Real Charge (TARC)

The TARC includes all cost elements of the credit and provides information in the form of a percentage on the total charge of the loan, on an annual basis.

TARC calculation for a loan of €10,000 repaid in 60 uninterrupted monthly instalments

	TARC	Monthly instalment	Total cost of credit
Green Loan	7.73%	€198.31	€11,993.84
Green Loan EIF	5.60%	€189.01	€11,435.34

The above TARC rate is used merely as an example and applies only if the following assumptions are met:

Green Loan Floating interest rate 6.464% (plus levy 0.6% under Law 128/75), broken down as follows: 3M-Euribor (3M-Euribor 28/02/2025: 2,464%) + fixed margin 4.00%, one-off charge of €95, paid upon disbursement and one-off application processing fee of €22 (such amount will be offset against the one-off charge, if the loan is eventually disbursed).

Green Loan Floating interest rate 4.464% (plus levy 0.6% under Law 128/75), broken down as follows: 3M-Euribor (3M-Euribor 28/02/2025: 2,464%) + fixed margin 2.00%, one-off charge of €95, paid upon disbursement and one-off application processing fee of €22 (such amount will be offset against the one-off charge, if the loan is eventually disbursed).

Remark:

Repayment is carried out in monthly amortization instalments, unless otherwise stated.
