Total Annual Real Charge (TARC)

The TARC includes all cost elements of the credit and provides information in the form of a percentage on the total charge of the loan, on an annual basis.

TARC calculation for a loan of €10,000 repaid in 60 uninterrupted monthly instalments

	TARC	Monthly instalment	Total cost of credit
Green Loan	11.19 %	€213.70	€12,914.66

The above TARC rate is used merely as an example and applies only if the following assumptions are met:

Green Loan Floating interest rate 9.650% (plus levy 0.6% under Law 128/75), broken down as follows: 3M-Euribor dependent on the ECB Intervention rate (ECB Intervention Rate 14/09/2022: 1.25%) + fixed margin 8.40%, one-off charge of €92.50, paid upon disbursement and one-off application processing fee of €22 (such amount will be offset against the one-off charge, if the loan is eventually disbursed).

Remark:

Repayment is carried out in monthly amortization instalments, unless otherwise stated.
