#### Deposits in Euro - Notes

- Escalating interest rates:** a single interest rate applies to the total balance of the account, at the rate applicable to the particular range within which that balance stands.
- Stepped interest rates:** the interest rate is stepped as the balance of the account rises (i.e. a different interest rate applies to the rising parts of the deposit). Stepped interest rates apply to “NBG Children” account.
- TARR:** The Total Annual Real Return (TARR) is calculated on the assumption that the amount deposited and the interest rate do not change for 1 year and the six-month interest (or the one-month interest for the Business BASIC και Business PRESTIGE accounts) is not withdrawn. Accordingly, as shown above, the TARR reflects the rates after tax withholding (currently 15%) and after 6-month (or one-month for the Business BASIC και Business PRESTIGE accounts) compounding.
- Interest posting:** Interest on interest-earning accounts is posted biannually (30 June & 31 December), with the exception of NBG Sight account for individuals and legal entities where interest is posted on a monthly basis. Interest is calculated on an actual/360 day basis. Interest on time deposits is calculated on a maturity date basis, unless otherwise stated. Interest is subject to tax deduction of 15% in favour of the Greek state.
- Debit balances:** Any debit balances of deposit accounts are charged with interest at an agreed rate depending on the type of the account and the origin of such debit balances (value date violation, overdraft etc.).
- ECB Intervention Rate: 2.15% (applicable from 11/06/2025)**

<p><b>1. Interest posting:</b> Interest is calculated on the following basis:</p> <p>a) For British Pound (GBP), S. African Rand (ZAR), Hong Kong Dollar (HKD), Polish Zloty (PLN) : Actual/365 [i.e. the actual days of accrual divided by a calendar year of 365 days].</p> <p>b) For all other currencies: Actual/360 [i.e. the actual days of accrual divided by a business year of 360 days].</p>
<p><b>2. TARR:</b> The Total Annual Real Return (TARR) is calculated on the assumption that the amount deposited and the interest rate do not change during a 365-day year and the six-month interest is not withdrawn. Accordingly, as shown above, the TARR reflects the rates after tax withholding (where tax on interest is withheld, currently 15%) and after 6-month compounding.</p>
