## Cover Pool Information

## 16. Additional Information

## Valuation Method Definition

NBG performs physical valuation on the residential collaterals at origination, and re-assess annually either through physical valuation or a Prop Index Valuation. Additional re-evaluation can take place in case of restructuring or in case of client's request. It's a policy on valuating at market value.

Market, Credit and Liquidity Risks

- Interest rate risk is monitored using the Interest Coverage and NPV tests, while interest rate mismatches are currently mitigated via overcollateralization (for the cover pool please see Table 12 "Interest Rate Type Distribution", while for the Outstanding Covered Bonds please see the Issuance Summary). No currency risk is expected as both assets and liabilities are in euro. There is a possibility to use swaps.
- For Credit Risk please refer to Table 6 \& 7 (Current Loan to Value \& Current Loan to Indexed Value).
- The transaction benefits from a Liquidity Reserve described in the Programme Documentation.
