Annual Percentage Rate (APR)

The APR includes all the costs associated with the loan, and states the total cost (on an annual basis) of the loan as a percentage rate.

APR calculations for a € 10,000 loan which is repaid in 60 consecutive monthly instalments

	APR	Monthly Instalment	Total loan cost for the borrower
Green Loan	9.83%	€207.65	€12,551.59

The above quoted APR rates should be taken merely as examples: They arise on the basis of the following criteria:

Green Loan at a floating rate of 8.414% (plus a 0.6% charge under Law 128/75), with a one-off charge of €92.50 payable on disbursement, plus a €22 charge for evaluation of the loan application (the latter charge is set off against the one-off charge if the loan is eventually disbursed).

General Remark:

Repayment is effected through monthly amortization instalments, unless otherwise indicated.
